# New Home Troubleshooting

## ELECTRICAL

**Problem:** No power to exterior plugs

**Remedy:** The GFCI receptacle may have tripped. The reset button is located on the receptacle itself. The receptacles can be found at the back or by the front porch. Check breaker on main electrical panel.

**Problem:** No power to bathrooms

**Remedy:** Reset GFCI located on the receptacles. Generally found in Powder room. Check breaker on main electrical panel.

**Problem:** No power to kitchen

**Remedy:** Reset GFCI located on receptacles on wall in kitchen.

**Problem:** No power to Whirlpool tub

**Remedy:** Reset GFCI located in basement. Can be found above electrical panel. Check breaker on main electrical panel

**Problem:** Light fixture not working

**Remedy:** If light is on a two way switch, try both switches. Replace light bulb.

**Problem:** Switch to living room does not work

**Remedy:** This switch is intended to power one receptacle for a lamp. Switch operates either the top or bottom section of the electrical outlet.

**Problem:** Plug and switches do not work

**Remedy:** Inspect breaker(s) on main electrical panel.

**Problem:** Complete power loss

**Remedy:** Check with your local utility company..
